Deliverable 1 : Requirements Table

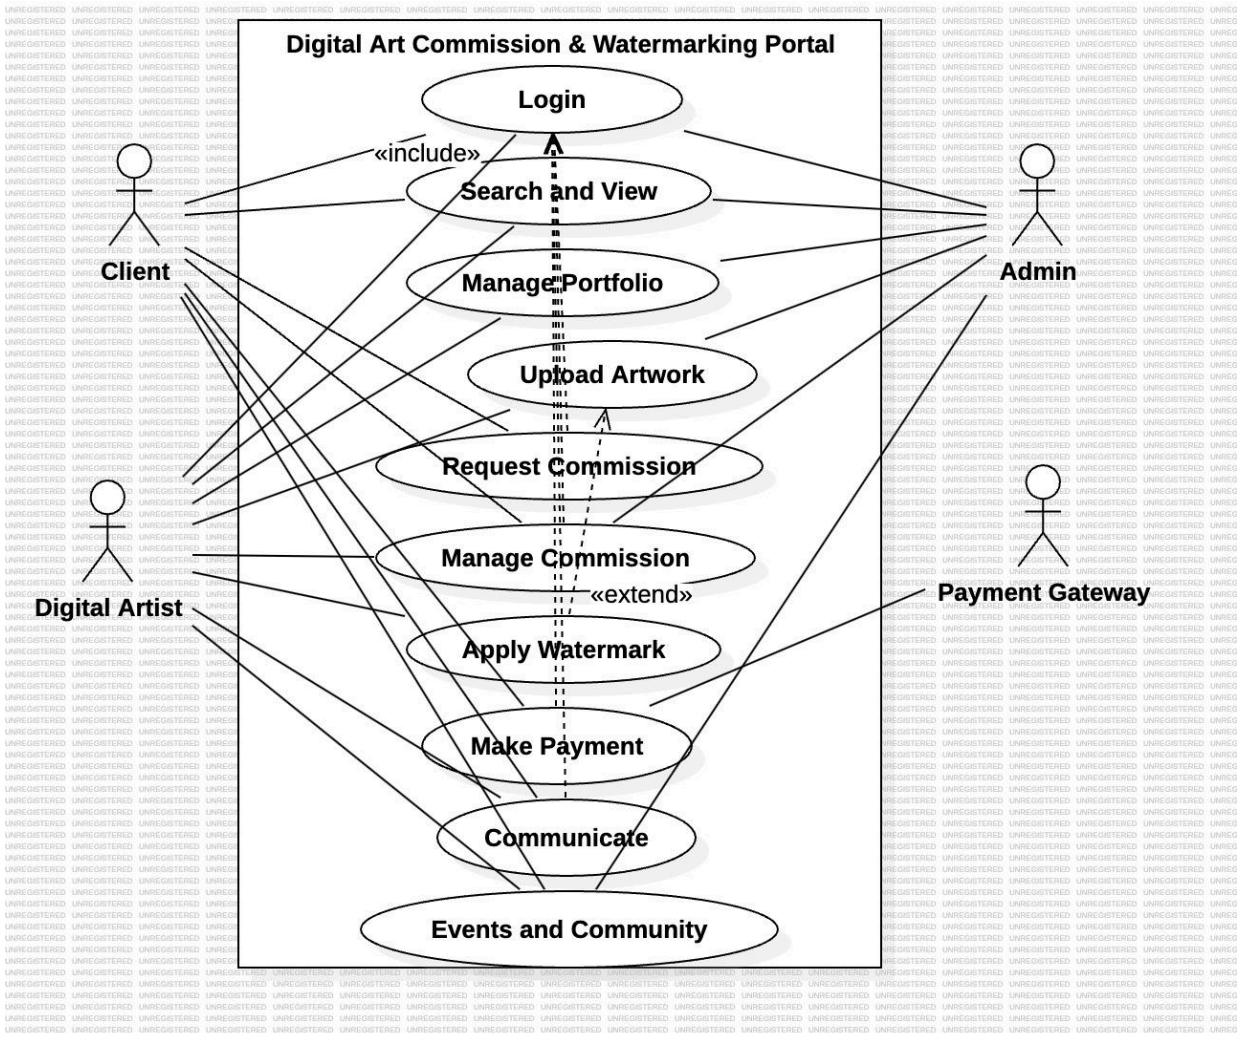

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale	Comments
FR-001	Functional	The system shall allow the Client Buyer and Digital Artist to log in securely using their credentials.	High	Pass if a registered user can log in with valid credentials.. Fail if valid credentials are rejected or unauthorized access.	Ensures that only registered users can access portal features and user-specific information.	Authentication method and password recovery mechanism should be specified.
FR-002	Functional	The system shall allow the Client to search and view artworks and artist portfolios based on available search criteria.	High	Pass if the system displays artworks/artist portfolios matching the search criteria and allows the buyer to view their details. Fail if relevant search results cannot be	Enables buyers to discover suitable digital artists and artworks efficiently.	Search criteria may include artist name, artwork category, style, and keywords.

				retrieved or viewed.		
FR-003	Functional	The system shall allow the Digital Artist to upload, manage, and update artworks in their portfolio.	High	Pass if an artist can upload a valid artwork, view it in their portfolio, and update or remove it. Fail if the artwork cannot be uploaded or portfolio changes are not saved.	Provides artists with a way to showcase and maintain their digital artwork.	Supported file formats and maximum artwork size should be specified.
FR-004	Functional	The system shall allow the Client Buyer to submit a commission request and allow the Digital Artist to accept, reject, and manage the commission.	High	Pass if a buyer can submit a commission request and the artist can view and update its status. Fail if the request cannot be submitted, retrieved, or its status cannot be updated.	Supports the core commission workflow between buyers and digital artists.	Commission details should include requirements, price, deadline, and status.
FR-005	Functional	The system shall allow the Digital Artist to apply a watermark to	High	Pass if a watermark is successfully applied to the	Protects artists' digital work from unauthorized	Watermark position, opacity, and

Deliverable 2 : UML Use-Case Diagram

Deliverable 3 : Use-Case Flow Document

Use Case	Goal	Actors	Main Flow	Alternate Flow
Request Commission	To allow a Client Buyer to submit a commission request to a Digital Artist and initiate the artwork commission process.	Client Buyer, Digital Artist	1. Client Buyer logs into the system. 2. Client Buyer searches and views available Digital Artists and their portfolios. 3. Client Buyer selects a Digital Artist and chooses to request a commission. 4. The system displays the commission request form. 5. Client Buyer enters the artwork requirements, preferences, and other necessary details. 6. Client Buyer submits the commission request. 7. The system validates and records the commission request. 8. Digital Artist receives and views the commission request. 9. Digital Artist reviews the requirements and accepts the commission. 10. The system records the acceptance and updates the commission status.	1. Client Buyer provides incomplete or invalid commission details. 2. The system detects the missing or invalid information and asks the Client Buyer to correct it. 3. Client Buyer updates the commission details and resubmits the request. 4. If the Digital Artist rejects the commission request, the system updates the commission status to Rejected. 5. The system informs the Client Buyer that the commission request was rejected. 6. If the Digital Artist does not accept the request, the commission remains pending until the artist takes an action.
